Preface

The Annual Report on Power Sector of the Kingdom of Cambodia 2013 Edition is compiled from informations for the year 2012 available with EAC and received from licensees, MIME and other organizations in the power sector. The data received from some licensees may not up to the required level of accuracy and hence the information provided in this report may be taken as indicative.

This report is for dissemination to the Royal Government, institutions, investors and public desirous to know about the situation of the power sector of the Kingdom of Cambodia during the year 2012.

With addition of more HV transmission system and MV sub-transmission system, more and more licensees are getting connected to the grid supply. This has resulted in improvement in the quality of supply to more consumers. By end of 2012, more than 91% of the consumers are connected to the grid system. More licensees are now supplying electricity for 24 hours a day. The grid supply has reduced the cost of supply and consequently the tariff for supply to consumers. Due to lower cost and other measures taken by Royal Government of Cambodia, in 2012 there has been a substantial increase in the number of consumers availing electricity supply. Each year the electricity supply is extended to more villages.

Any comments or suggestions from Royal Government, institutions, investors or public are welcome and will be considered by EAC to publish more useful reports in future reflecting the actual situation of the sector.

EAC expects that this report will be a valuable document for the information for the year 2012 on the power sector of the Kingdom of Cambodia.

CHAPTER 1

Basic Law and Regulations for Management of Power Sector in the Kingdom of Cambodia

1.1 Electricity Law of the Kingdom of Cambodia

The Electricity Law of the Kingdom of Cambodia was adopted by National Assembly on November 06, 2000 at the plenary session No.5 of term 2, and agreed by the Senate on the form and content of the law on December 13, 2000 at the plenary session No.4 of term 1 and announced to be consistent with the Constitution by the Constitutional Council on January 15, 2001. The Law was finally promulgated by ROYAL DECREE No. NS/RKM/0201/03 dated February 02, 2001 by Preah Bath Samdech Preah Norodom Sihanouk, King of Cambodia. The purpose of this law is to govern and to prepare a framework for the electric power supply and services throughout the Kingdom of Cambodia. This law covers all activities related to supply of electricity, provision of services and use of electricity and other associated activities of power sector.

In preparation of a framework for the electric power supply and services throughout the Kingdom of Cambodia, the Law provides for the establishment of “Electricity Authority of Cambodia” (EAC), a legal public entity, being granted the right by the Royal Government to be an autonomous agency to regulate the power sector in the Kingdom of Cambodia.

The Electricity Law provides that the Electricity Authority of Cambodia shall consist of three Members, including the Chairman. The Chairman and Members shall be designated and proposed by the Prime Minister and shall be appointed by Royal KRET. Each Member shall have a 3 (three) year term, which shall be staggered so that the term of the initial members shall expire at different times.

As per the Electricity Law of the Kingdom of Cambodia, “no person may operate as an electric power utility or provide electric power services unless he/she has performed under and in accordance with the terms of a valid license issued by the Authority. Any person, who is operating as an electric power utility at the time of promulgation of the Electricity Law, shall apply to the Electricity Authority of Cambodia for a license within 6 months of receiving the initial notice from the Authority”.

Regulations, orders and decisions issued by the Electricity Authority of Cambodia are enforceable as per the Electricity Law. Electricity Authority of Cambodia is competent to file complaints in the courts of the Kingdom of Cambodia for any violation of the Electricity Law or the regulations, orders, decisions as well as licenses issued by EAC.

The Law also provides for the rights, obligations and penalty on the service providers as well as the consumers in order to establish fair condition in the business and the use of electricity.

The enactment of the Electricity Law of the Kingdom of Cambodia is a big leap forward in bringing reforms in the electricity sector. These reforms will encourage the private investors to invest in the power sector in a fair, just and efficient manner for the benefit of our society.

1.2 Responsibilities of Ministry of Industry, Mines and Energy and Electricity Authority of Cambodia in Power sector

Article 3 of the Electricity Law of the Kingdom of Cambodia defines the responsibility of Ministry of Industry, Mines and Energy and Electricity Authority of Cambodia (EAC) separately. As per the provisions of this article, after EAC has started its operation, the governing of the power sector in the Kingdom of Cambodia shall be bifurcated, 1-the Ministry of Industry, Mines and Energy shall be responsible for setting and administrating the government policies, strategies and planning in the power sector and 2-the Electricity Authority of Cambodia shall ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustain ably and in a transparent manner.

The Ministry of Industry, Mines and Energy, through its duty for setting and administering the government policies, strategies and planning in the power sector, is the institution of the Royal Government to chalk out the path that the power sector in the Kingdom of Cambodia is going to take. This institution is also responsible for setting the technical standards for the power sector.

EAC is responsible to issue rules, regulations and procedures and to monitor, guide, coordinate the operators in power sector both suppliers and consumers including requiring them to follow the policy and guidelines and technical standards issued by Ministry of Industry, Mines and Energy. EAC has to ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustain ably and in a transparent manner.

The roles of the two organizations in governing power sector in the Kingdom of Cambodia as provided in the Electricity Law of the Kingdom of Cambodia is shown in the following diagram:

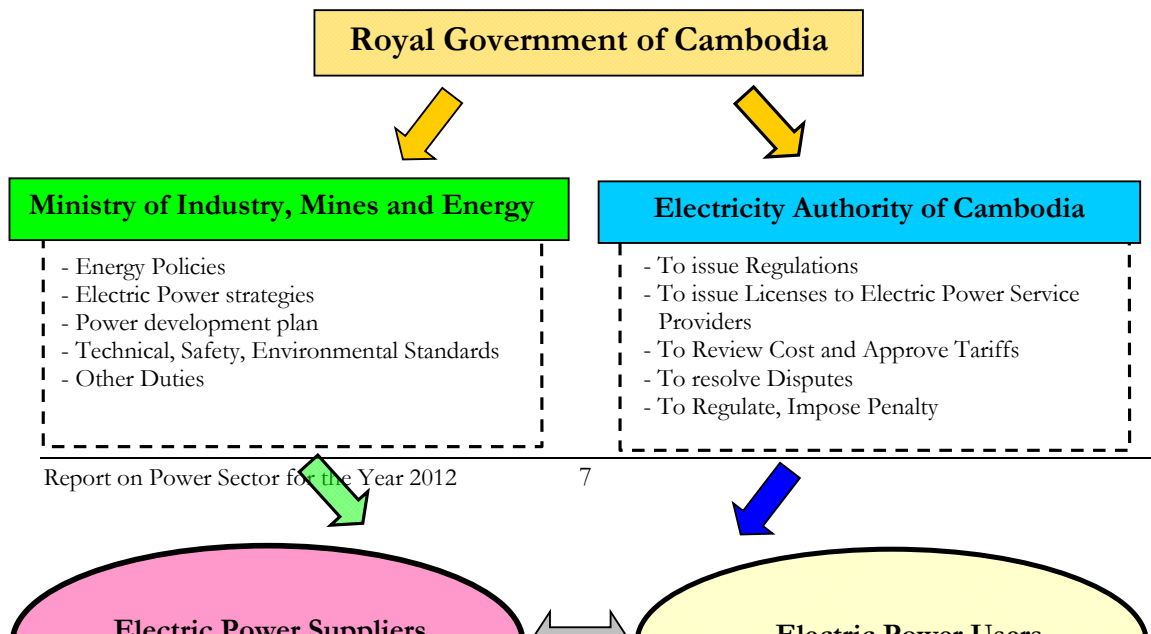

Figure 1: Separation of role between MIME and EAC

1.3 Duties of the Electricity Authority of Cambodia in the Power sector

1.3.1 Regulation of the Electric Power Services

Electricity Law of the Kingdom of Cambodia has granted the right and autonomy to EAC to regulate the activities relating to Electric Power Services in order to ensure that the services and the business of the electric power service providers are actually carried out efficiently, qualitatively, sustainably and in a transparent manner. Granting of the right to EAC to regulate these services does not mean that Law has provided for EAC to get involved in or to manage the internal business of the electric power service providers; but it allows EAC to advise, guide or direct the service provider, to modify or cease such activity which affects the service being performed efficiently, qualitatively, sustainably and in a transparent manner. The guiding action or direction to revise or cease any activity is to be carried out in public interest and to protect the interest of the consumers.

1.3.2 Governance of relation between Delivery, Receiving and Use of Electricity

The relation between Delivery, Receiving and Use of Electricity means the relations between generators and transmitters, between generators and distributors, between transmitters and distributors or between suppliers and consumers. These relations relate only to the cycle of delivery, receiving and use of electricity. The relations can cover the conditions of delivery and receiving electric power services between above parties; the obligations and rights of the above parties in delivery and receiving electric power services; the cost of electric power services that one party pays to the other party; the quality of electric power services that one party provides to other parties etc.

1.3.3 Powers and Duties of Electricity Authority of Cambodia

According to the Article 7 of Electricity Law of the Kingdom of Cambodia, EAC has the following powers and duties:

- (a) To issue, revise, suspend, revoke or deny the licenses for the provision of electric power services as provided in article 29 of the Law;

- (b) To approve tariff rates and charges and terms and conditions of electric power services of licensees, except where the Authority consider those rates or charges and terms and conditions are established pursuant to a competitive, market-based process;
- (c) To enforce regulations, procedures and standards for investment programs by licensees;
- (d) To review the financial activities and corporate organization structure of licensees to the extent that these activities and organization directly affect the operation of the power sector and the efficiency of electricity supply;
- (e) To approve and enforce the performance standards for licensees;
- (f) To evaluate and resolve consumer complaints and contract disputes involving licensees, to the extent that the complaints and disputes relate to the violation of the conditions of license;
- (g) To approve and enforce a uniform system of accounts for all licensees;
- (h) To prepare and publish reports of power sector and relevant information received from licensees for the benefit of the Government and the public;
- (i) To prescribe fees applicable to licensees;
- (j) To determine the procedures for informing the public about its activities within its duties, in order to ensure that the Electricity Authority of Cambodia complies with the principle of transparency as set forth in Article 3 of this law;
- (k) To issue rules and regulations and to make appropriate orders, and to issue temporary and permanent injunction for electric power services;
- (l) To impose monetary penalty, disconnect power supply, suspend or revoke the license for the violations of this Law, standards and regulations of the Electricity Authority of Cambodia;
- (m) To require the electric power service providers and the consumers to obey the rules relating to the national energy security, economic, environmental and other Government policies;
- (n) To perform any other function incidental or consequential to any of the duties as describes above; and
- (o) To establish the terms and conditions of employment of the officers or employees including experts/advisors of Electricity Authority of Cambodia.

1.3.4 Legal Documents for Governing and Regulating Electric Power Services and use of Electricity

The types of Legal Documents for governing and regulating electric power services and use of electricity in the Kingdom of Cambodia are classified in Table 1 below:

Table 1: Legal Documents for Regulating Electric Power Services and use of Electricity

1 Law	The Electricity Law of the Kingdom of Cambodia and other Laws to manage and regulate the power sectors. Laws are main documents in regulating all activities in power sector and also the main base for preparation of other legal documents needed for managing and regulating the power sector.
2 Legal Documents of Government Class	Sub-Decree, Decision, Notification etc. of the Royal Government. These documents are for determining the power sector policy and for regulating the activities in power sector and are issued by the Royal Government under the provisions of the Electricity Law. The main principles of the power sector, which

	are not defined in the Law, can also be issued for application as a standard document of the Royal Government.
3 Legal Documents of Ministry Class	<p>Declaration (Prakas) and Decisions of the Ministry of Industry, Mines and Energy. These are the documents for managing the works, which are under the duties of Ministry of Industry, Mines and Energy such as policy, development, planning, strategy, technical standards and other determinations in power sector such as:</p> <ul style="list-style-type: none"> - Investments in the rehabilitation and development of power sector in the short, medium and long term; - Restructuring, private sector participation and privatization of Public Utilities; - Promotion of the use of indigenous energy resources in the generation of electricity; - Planning and agreements on the export and import of electricity; - Subsidies to specific classes of customers and priorities regarding consumers of electricity; - Promotion of efficiency in generation, transmission, distribution and consumption of electricity and action taken to create a Comprehensive Electricity Conservation Program for Cambodia; and - Electricity sector emergency and energy security strategies.
4 Legal Documents of EAC	Licenses, regulations, procedures and decisions of Electricity Authority of Cambodia, which are issued by EAC under the framework of the Electricity Law. These documents are for managing and regulating the electric power services and the use of electricity in the Kingdom of Cambodia.

The legal documents prepared and put into force for managing and regulating the provision of services and use of electricity in the Kingdom of Cambodia up to the end of the year 2012 are shown in the table 2 below:

CHAPTER 2

Information on Electricity Authority of Cambodia – the Regulator for the Power Sector in the Kingdom of Cambodia

2.1 Regulator in Power Sector

According to the Electricity Law, the Electricity Authority of Cambodia (EAC) shall consist of 3 (three) members. The members of EAC shall be designated and proposed by the Prime Minister and shall be appointed by the Royal KRET. The members of EAC during 2012 are as follows:

1. **H.E. Dr. Ty Norin**, Chairman
2. **H.E. Hul Kunnak Vuth**, First Vice-Chairman
3. **H.E. Sam Oeun Kim Hoeun**, Second Vice-Chairman

2.2 Organization of Electricity Authority of Cambodia

As provided by Electricity Law, EAC shall have one secretariat for assistance. This secretariat shall be headed by an Executive Director. The Executive Director shall be appointed by Chairman of EAC after consultation with other members.

The highest authorities of EAC are the three regulators i.e. the chairman of EAC and the two vice-chairmen. Under the chairman and vice-chairmen, there is one secretariat headed by the executive director. Secretariat provides support to EAC for administrative and technical works and controlling the specialized departments under it. With the increase in work load of EAC, the secretariat of EAC was reorganized in 2011, increasing the number of departments from four to six for performing the works in their specialized fields and the Department are 1 – Department of Administration and Personnel, which is in charge of administration and works relating to personnel in the employment of EAC; 2 – Department of Legislation, which is in charge of Legal works, resolution of disputes and imposition of fines; 3 – Department of Accounting and Finance, which is in charge of finance, License fees and accounts works; 4 – Department of Tariff and Monitoring of Licensees' accounts, which is in charge of monitoring and approval of tariffs of licensees for sale of electricity and monitoring of the accounts of licensees to assess the cost of supply; 5 - Department of Supply and Consumer Affairs, which is in charge of works relating to supply of electricity by Distribution licensees and consumer affairs; 6 – Department of Generation, Transmission and Sub-transmission – which is in charge of works relating to generation licences and transmission licenses for both transmission and sub-transmission. The organization structure of EAC is as shown in the schematic diagram given below.

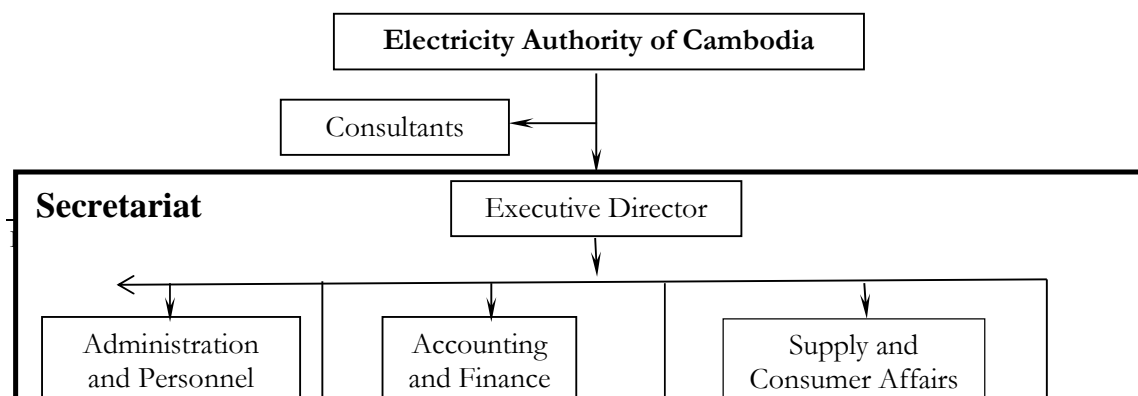

Figure 2: Organization chart of EAC**2.3 The Budget of EAC and License Fees**

The Electricity Authority of Cambodia is an autonomous agency working for the interest of all electric power service providers and electricity users in the Kingdom of Cambodia. Therefore the expenditure of EAC for its operation is to be borne by all electric power service providers in the form of payment of license fees. Article 27 of the Electricity Law provides that EAC shall have an autonomous budget for its operation. This budget shall come through License Fees paid by applicants and licensees as determined by EAC. For governing the license fees charged by EAC, The Electricity Law has further provisions that “The maximum license fees are to be determined by a Sub-Decree of the Royal Government”.

Under the provisions of the Electricity Law of the Kingdom of Cambodia, the Royal Government have issued sub-decree No. 131-OR-N-KR/BK dated December 27, 2001 determining the maximum license fees applicable to the electric power service providers in the Kingdom of Cambodia.

According to Electricity Law, EAC shall determine the rate of the license fees to be paid by the licensees every year based on the maximum license fees determined by the sub-decree. For the year 2012, EAC has determined the license fees to be paid by licensees vide Notification No. 00024-SR-11-EAC dated January 31, 2012; which made no change in the License Fee of 2011. The license fees determined for the years 2011 and 2012 are given in Table 3 below.

2.4 Financial Statements of EAC

The Electricity Law provides that the annual financial statement, together with the accounting books of the Authority and related records shall be audited by auditor and inspected by the National Audit Authority. Within 1 (one) month after auditing, the Authority shall submit all reports to the Prime Minister for approval, and shall publish the approved reports to the public. The audited income statement of Electricity Authority of Cambodia for the years 2010 and 2011 is given below.

Information on Licenses and Licensees in the Kingdom of Cambodia

CHAPTER 3
Information on Licenses and Licensees in the Kingdom of Cambodia

3.1 Licenses for Providing Electric Power Services

As per the provisions of the Electricity Law, each electricity service provider is required to have a license issued by EAC and to abide by the provisions of the Electricity Law, its license, and regulations and procedures issued by EAC. A License authorizes the licensee to provide electric power services as per the provisions stated in the license (called the Conditions of License). A license has two main parts:

- a. Decision to grant the right to provide the electric power service, and
- b. Conditions of license.

Types of licenses that can be issued and regulated by EAC are stated below:

1. **The Generation License:** It grants the right to generate electric power from specified generation facilities.
2. **The Transmission License:** It grants the right to provide transmission service. There are 2 types of Transmission License: National Transmission License and Special Purpose Transmission License.
 - i. **The National Transmission License** can be issued only to state power transmission company which is under the Government control, to have the right to provide the transmission service for delivering the electric power to the distribution companies and bulk power consumers throughout the Kingdom of Cambodia
 - ii. **The Special Purpose Transmission License** grants the right to construct, own, and operate specified transmission facilities in the Kingdom of Cambodia for the specified purpose.
3. **The Distribution License:** It grants the right to provide the electricity distribution services in a determined contiguous territory.
4. **The Consolidated License:** It is a license, which may be the combination of some or all types of licenses. The Consolidated License can be issued to EDC and to the isolated systems to grant the right to generate, transmit, dispatch, distribute and sale electric power to the consumers. In issuing Consolidate License, EAC shall consider long term planning and the objectives of Government policy to reduce long run marginal cost for supply of electricity to consumers, establish a national grid and progressively expand this grid throughout Kingdom of Cambodia.
5. **The Dispatch License:** It grants the right to control, manage, and operate the dispatch facilities for facilitating delivery and receiving electricity from the generation, transmission and distribution systems.
6. **The Bulk Sale License:** It grants the right to buy electricity from any Generation Licensee or from the power systems of neighboring countries for sale to Distribution Licensees or to large customers in one connected power system.
7. **The Retail License:** It grants the right to engage in the sale of electric power to consumers in a contiguous service territory.

8. **The Subcontract License:** It grants the right to provide electric power services according to the subcontract agreement with the existing licensee.

3.2 Licenses issued, revoked and type changed during 2012

The number of licenses issued, revoked and valid during the year 2012 is given in the Table below.

Table5: Type and Number of Licenses issued and valid

No.	Type of License Issued	Licenses valid at end of 2011	Issued during 2012	Revoked during 2012	Change of type during 2012	Valid at end of 2012

Nareth Co Ltd Electricity Development (52L) availed power supply from EDC Battambang and stopped purchasing power from Pursat Power Supply Enterprise (148L) and hence the Generation License of Pursat Power Supply Enterprise (148L) was terminated. The electricity supply business of Mrs. Oun Neang (248L) was taken over by K.R.Y. Trading Co., Ltd (244L) and hence the license of Mrs. Oun Neang (248L) was terminated. EDC took over the electricity supply business of Electricity of Kratie Province (59L) and hence the license of Electricity of Kratie Province (59L) was terminated. P S P C Investment Co., Ltd (206L) took over the business of Mrs. Bun Liv (17L) and Mrs NovSopheha (198L) and hence the licenses of Mrs. Bun Liv (17L) and Mrs NovSopheha (198L) were terminated. Mrs. Ou Kimheng (168L) transferred her business to Eastern Power Supply Enterprise (49L) and hence her license was terminated.

During 2012, the Consolidate license consisting of Generation and Distribution licenses issued to the following licensees were changed to Distribution License:

1. Pheng Keang Electricity Pte., Ltd (License No.006L)

2. Electricity Samrong Yorng Enterprise (License No. 015L)
3. Mr. Sok Thy (License No. 029L)
4. Mr. Ly Bunthy (License No. 030L)
5. Mr. Kong Sophal (license No. 042L)
6. Mr. Som Visal (License No. 043L)
7. Electricity Chhouk Enterprise (License No. 044L)
8. Mrs. Touch Mantha (License No. 068L)
9. Mrs Chao Nuy (License No. 077L)
10. Mr. Thon Thoeurn (License No. 079L)
11. Mr. Sok Vitith (License No. 080L)
12. Mr. Sun Pov (License No. 091L)
13. Akissni Touk Meas Enterprise (License No. 093L)
14. Mr. San Ke (License No. 098L)
15. Mr. Chhin Song (License No. 101L)
16. Mr. Soeung Sovanna (License No. 105L)
17. Mrs Sea Kech (License No. 110L)
18. Mrs Sok Kheng (License No. 118L)
19. Mr. Chan Keat (License No. 120L)
20. Mr. Taing Cheng Oing (License No. 141L)
21. Mrs Nguon Socheatey (License No. 153L)
22. Mr. Uy Sopath (License No. 154L)
23. Sahakreas Moul Tit Akkisny (License No. 176L)
24. Mr. Pech Sopheap (License No. 178L)
25. Mrs. Chea Kimthat (License No. 184L)
26. Mr. Lim Sisophorn (License No. 188L)
27. Electricity Kondeung Enterprise (License No. 196L)
28. Mr. Ou Chanrat (License No. 201L)
29. Mrs. Kung Samon (License No. 202L)
30. Mr. Sam Nang Sathia (License No. 246L)
31. Mrs. Ouch Sophalla (License No. 246L)
32. Mrs. Sor Sa Un (License No. 266L)
33. Mrs. Tech Yeatra (License No. 270L)
34. Mr. Hung Huy (License No. 271L)

During 2012, the distribution License issued to Electricity Development and Construction Company (License No. 122L) was changed to Consolidate License consisting of Special Purpose Transmission and Distribution License.

Electricite Du Cambodge (EDC) is the only licensee in the Public Sector, all other licensees being in private sector.

Province wise area of supply served by Consolidated Licensees, Distribution Licensees and Retail Licensees are given in **Annex 1**. In case a licensee is connected to a grid supply, the Annexure 1 shows the name of the Grid and for licensees with isolated operation, the annexure shows the normal hours of supply for the licensee.

Maps of Provinces of Cambodia showing the location of the licensed area of supply up to end of 2012 is given separately in this report.

3.3 Revision of Licenses

Licenses are revised from time to time as required for various reasons. 118 Licenses were revised during 2012. The revisions were for extension/ reduction of area of supply -52 licenses, extension of term of the license – 51 licenses, change of ownership 18 licenses, Change in the shareholding – 9 license, addition of generation capacity – 1license and change of type of license – 35 licenses. At the end of 2012, out of 288 licenses (distribution license as individual type or in combination with other type of licenses), 283 licenses (98.3%) were having a term of 5 years or more.

3.4 Licenses in Operation during 2012

Out of 312 licenses valid at the end of 2012, eleven licenses, as indicated in Annex 1, 3, 4, 7 and 9 did not have regular operation during the year 2012. Out of the balance 301 licensees in operation at end of 2012, some licensees operate in more than one province. The number of different types of licensees operating in each province is given in the table below.

Table 6 : Number of different types of Licensees operating in each Province/City

3.5 Licenses during the decade

EAC issued the first license in February 2002. The types of license issued during the initial years were (i) Consolidate License consisting of Generation, National Transmission and Distribution License (issued to EDC), Generation License, Distribution License and Consolidate License consisting of Generation and Distribution License. The first Retail License was issued in July 2006 and till end of 2012, only one retail license has been issued. With the construction of 115 kV transmission line from Thai border to Banteay Meanchey, Battambang and Siem Reap in the private sector, the first Special Purpose Transmission License was issued in February 2007. With the development of subtransmission system and expansion of distribution to new areas Consolidate license consisting of Special Purpose Transmission and Distribution License were issued, and the first such license was issued in June 2008. The number of licenses valid at the end of each year during 2002-2012 is given in the following Table:

3.6 Efforts of Government of Cambodia, Rural Electrification Fund and EAC to assist licensees

The annual licensee meet for the year 2012 was organized by EAC on 18th December 2012. This was the 11th Annual Meeting since EAC started functioning in 2001. During the meet H.E. Minister of Industry, Mines and Energy described the efforts and policy of the Royal Government of Cambodia. He stated that RGC continues with its efforts to develop large electricity generating stations with reasonable tariff, transmission lines, substations and subtransmission lines in accordance with the master plan so that power supply with reasonable tariff is available in all parts of Cambodia. Kamchay hydroelectric station (193.2 MW) was put in operation in late 2011 and

Kirirom III hydroelectric station (18MW) is put in operation in 2012. The first coal-fired plant is Sihanoukville is expected to be operational in early 2013. The transmission line from Phnom Pemh to Battambang with substations at Kampng Chhanang, Pursat and Battambang was commissioned in 2012. A number of hydro and coal fired power plants and transmission line projects are under construction and likely to be operational in coming years. To achieve the goal of the government on rural electrification and to implement the master plan, The Hon Minister provided the following guidelines:

1. Henceforth MIME and EAC may allow private investment in subtransmission only in cases where EDC is not willing or does not have the ability to develop the subtransmission system.
2. Instead of giving a new license for distribution in areas close to the licensed area of an existing licensee, the existing licensee must be forced to cover the high and low consumer density area surrounding its licensed area. Concession letter and license to new licensees may be issued only for areas far away from the licenses area of existing licensees.
3. In cases, where concession letters are issued but the entrepreneur is not developing the infrastructure and license has not been issued, the concession should not be renewed.
4. In areas covered by the grid supply and no private investment is coming forward for electrification of the area, EDC should invest in the distribution system.

H.E. Minister of MIME further directed EAC to issue regulations on fines and penalties for licensees violating the Electricity Law and license conditions.

During the Annual Licensee Meet, H.E. Chairman of EAC intimated the status of electrification in Cambodia. He stated that the licensed area covers about 10,160 villages, 72.91% of total number of villages in Cambodia, out of which 6,919 villages have electricity infrastructure to supply electricity providing electricity to 900,982 households which is about 40% of total households in Cambodia. The Chairman, EAC, also intimated the main provisions of the proposed “Regulation on Imposing Monetary Penalty for Violation of Electricity Law, License Condition, Standards and Regulations issued by Electricity Authority of Cambodia”.

During 2012, Rural Electrification Fund (REF), which was working as an independent organization was transferred to the control of EDC.

Chapter 4

Generation, Import and Transmission

CHAPTER 4 Generation, Import and Transmission

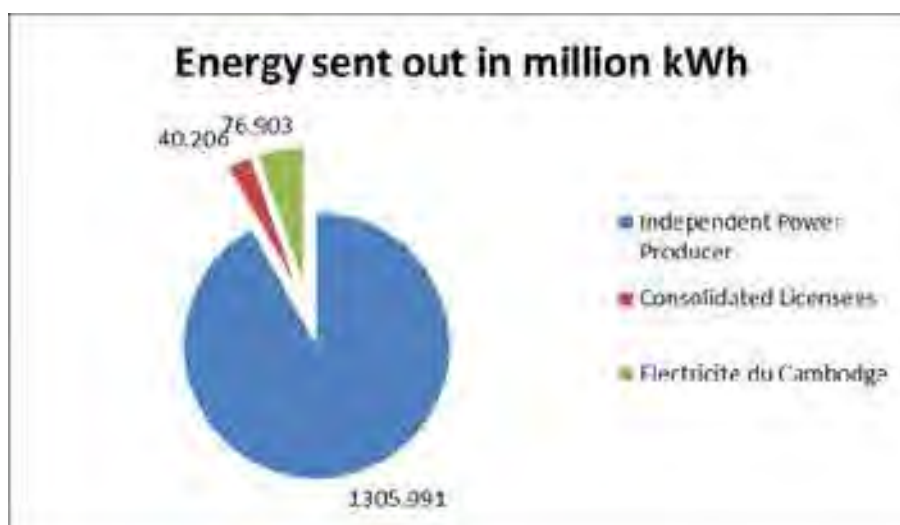

4.1 Generation in Cambodia

4.1.1 Generation by Type of License

Two types of licensees generate electricity in the Kingdom of Cambodia. Independent Power Producers having generation license generate and sell electricity to suppliers or industries in compliance with the Power Purchase Agreement with that supplier or industry; and Consolidated Licensees having generation license as one of its licenses generate electricity for supply to consumers through their distribution system.

The information on operation of generation system by Generation Licensees, Electricite du Cambodge and Consolidated Licensees is given in **Annex 3**, **Annex 8A** and **Annex 9** respectively. The summary information about installed capacity and energy sent out by the Independent Power Producers, EDC and Consolidated licensees is given in **Annex 2(b)**.

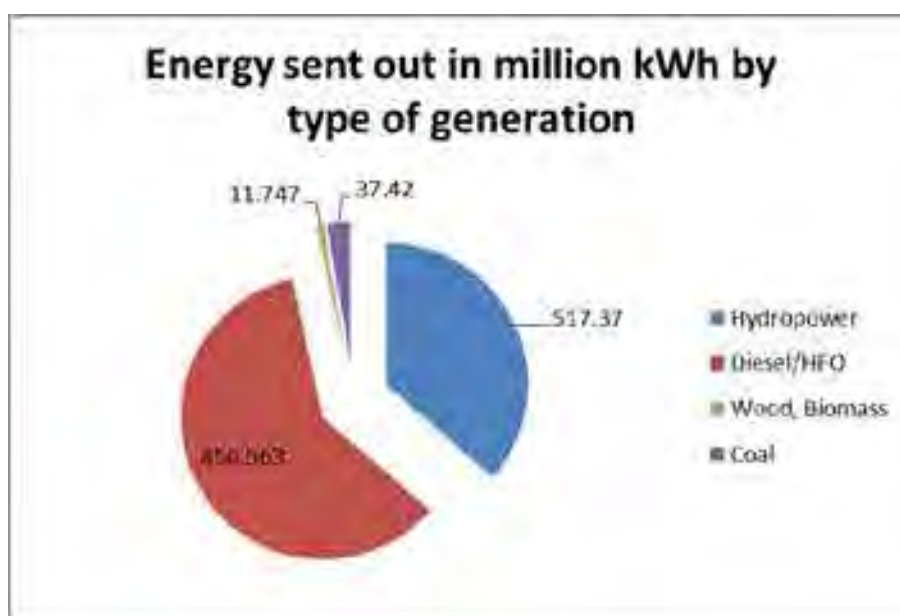

The energy generated and sent out by all licensees in Cambodia during 2012 is 1,423.10 GWh, which is 39.72 % more than the energy sent out during 2011. The quantum of energy sent-out by the Independent Power Producers, Consolidated licensees and EDC is shown in the graphic given below:

4.1.2 Generation by Type of Generation Facilities

Electricity generation facilities in the Kingdom of Cambodia for the year 2012 can be divided into 4 types: 1 - Hydropower Plants, 2 - Diesel power Plants, 3- Thermal Power Plants using coal and 4 – Plants using wood and other biomass. During 2012 the following five Hydropower Plants were in operation – Kirirom1, Kirirom 3 and Kamchay connected to the National Grid, Ratanakiri connected to Ratanakiri power system of EDC, and Mondulkiri, supplying electricity to provincial town of Mondulkiri. SL Garment Processing (Cambodia) Ltd, supplying part of its generation to EDC Phnom Penh, and Angkor Bio Cogen Co., Ltd supplying power to Angkor Kasekam Roongroeung Co., Ltd, an industry, use wood, agricultural products or waste as fuel for generation of electricity. Sovanna Phum Investment Co., Ltd, an IPP, having License No. 213L, uses coal to generate electricity and supplies to EDC Phnom Penh. All other power plants of the licensees are diesel power plants using Heavy Fuel Oil (HFO) and/or Light Diesel Oil (LDO). The summary information on installed capacity and energy sent out by type of generation is given in **Annex 2(c)**. Due to generation from Kirirom 3 and Kamchay hydro projects, the energy generated by Hydropower Plants in 2012 increased to 517.37 million kWh, which is almost 10 times than the energy generated by Hydropower Plants in 2011.

The quantum of energy sent-out by the Independent Power Producers, and Consolidated licensees classified by generation type is shown in the graphic given below.

4.1.3 Generation Projects under implementation and planning

Following Generation Projects are under construction and their position at the end of 2012 is stated below:

- i. Stung Atay Hydroelectric Project: The project consists of PH 1 with capacity of 2 x 10 MW, PH 2 with capacity of 4 x 25 MW and 115 kV line from hydroelectric plant to Ou Saom Substation and 230 kV line from Ou Saom substation to Pursat Grid substation. The project is being implemented by C.H.D. (Cambodia) Hydropower Development Co. Ltd. PPA has been signed with EDC. Generation License No. 290L has been granted by EAC. Work is in progress and is likely to be operational in 2013
- ii. Stung Tatay Hydroelectric Project: The project consists of PH with capacity of 3 x 82 MW and 230 kV line from hydroelectric plant to Ou Saom Substation. The project is being implemented by Cambodian Tatay Hydropower Limited. PPA has been signed with EDC. Generation License No. 293L has been granted by EAC. Work is in progress and is likely to be operational in 2015
- iii. Lower Stung Russei Chrum Hydroelectric Project: The project consists of PH 1 with capacity of 2 x 103 MW, PH 2 with capacity of 2 x 66 MW and 230 kV line from hydroelectric plant to Ou Saom Substation. The project is being implemented by China Huadian Lower Stung Russei Chrum Hydroelectric Project (Cambodia) Company Limited. PPA has been signed with EDC. Work is in progress and is likely to be operational in 2015
- iv. 100 MW Coal Fired Power Plant in Sihanoukville: The Project consists of 2 x 50 MW (net) coal fired electric power generating facility at Sihanoukville. The project is being implemented by Cambodian Energy Limited. PPA has been signed with EDC. Construction has started and is likely to be commissioned in 2013.
- v. 240 MW Coal Fired Power Plant in Sihanoukville: The Project consists of 2 x 120 MW (net) coal fired electric power generating facility at Sihanoukville. The project is being implemented by Cambodia International Investment Development Group Co. Ltd. PPA has been signed with EDC. The project is scheduled to be commissioned in 2015.
- vi. 135 MW Coal Fired Power Plant in Sihanoukville: The Project consists of 1 x 135 MW coal fired electric power generating facility at Sihanoukville. The project is being implemented by Cambodia International Investment Development Group Co. Ltd. PPA has been signed with EDC. The project is scheduled to be commissioned in 2017.
- vii. Sesan Hydroelectric Project: PPA has been signed between EDC and Hydro Power Lower Sesan 2 Co., Ltd on 26 November 2012. The plant is proposed to have 5 units of 80 MW each.
- viii. Stung Cheay areng Hydroelectric Project: Feasibility study has been done. The proposed capacity is 3x36 MW.
- ix. Prek Laang Hydroelectric Project: Pre-feasibility study has been done. The proposed capacity of the plant is 90 MW.

4.2 Energy Imported from Neighboring Countries

Cambodia imports electricity from Thailand, Vietnam and Laos. The import from Vietnam is at 22 kV through a number of connections and at 230 kV through Vietnam – Takeo - Phnom Penh 230 kV line. Similarly import from Thailand is at 22 kV through a number of connections and at 115 kV through Thailand - Banteay Meanchey - Battambang and Siem Reap line. The import from Laos is at 22 kV to Steung Treng area.

Based on the Electricity Trade Agreement between Ministry of Industry, Mines and Energy of Cambodia with the Ministry of Industry of Vietnam, EDC has signed Power Purchase

Agreements with Vietnam Power No.2 for import of electricity at a number of points for supply of electricity to areas located near the Cambodia – Vietnam border either by themselves or through other licensees. The tariff for import from Vietnam at 22 kV was increased from 6.9 US Cents to 8.35 US Cents from the middle of 2012. The tariff for import by EDC at 230 kV is a time of use tariff in USD/kWh being different during rainy season and rest of the year. This tariff was also increased in 2012.

Some private companies have received the right from MIME to purchase electricity from Provincial Electricity Authority of Thailand for supply to areas near Cambodia – Thai border. Cost of electricity imported from Thailand at 22 kV is based on two-part time of use tariff of Provincial Electricity Authority applicable for the category of consumer. The tariff has demand charges (Baht per kilowatt of maximum demand), energy charges (Baht per kWh with different rates for energy drawn during peak and off-peak hours), service charges (fixed charge as Baht per month), power factor penalty (Baht per excess KVAR) and Ft (change in expenses charge in Baht/kWh). Because of such tariff structure, the cost of electricity varies in different months due to different use conditions. The tariff for import by EDC at 115 kV from Thailand consists of energy charge as Baht per kWh and Ft (change in expenses charge in Baht/kWh).

EDC imports electricity from Laos at 22 kV for supply to Steung Treng area.

The details of import from neighboring countries are given in Annex 10A to 10G.

4.3 Electricity Transmission

4.3.1 High Voltage System in Cambodia

During the year 2012 the following high voltage lines and substations were commissioned.

- (i) 230 kV line from GS 4 in Phnom Penh to Battambang with grid substations at Kampong Chhanang, Pursat and Battambang
- (ii) 230 kV line from O-Saom to Pusat with substation at O-Saom
- (iii) 115 kV line from Kirirom 1 hydropower station to Kirirom 3 hydropower station.

The details of high voltage grid substations (GS) operated by different licensees at the end of 2012 is stated in the following table.

Table 8: Details of High Voltage Substations

4.3.2 High Voltage Lines under implementation

Following Transmission Line Projects are under construction and their position at the end of 2012 is stated below:

- i. 230 kV transmission line from Phnom Penh to Kampong Cham with substation at Phnom Penh and Kampong Cham: The transmission line project is being implemented by Cambodian Transmission Limited under a transmission agreement with EDC. The line is under construction and likely to be commissioned in 2013.
- ii. 230 kV transmission line from Kampot to Sihanoukville with substation at Sihanoukville: The transmission line project is being implemented by EDC. The line is under construction and likely to be commissioned in 2013.
- iii. 230 kV transmission line from Kampong Cham to Kratie with substations at Kampong Cham and Kratie: The transmission line project will be implemented by L.Y.P Group Co., Ltd and is likely to be commissioned in 2017.

4.4 Operation of the High Voltage Grid System

In 2011, two separate High Voltage Grid System (i) the National Grid and (ii) the Banteay Meanchey Grid operated in Cambodia. The National Grid comprised of Substations GS1, GS2, GS3, GS4 in Phnom Penh, and substations at Takeo and Kampong Speu. The National Grid received electricity from import from Vietnam, Hydropower plants at Kirirom 1&3, and Kamchay and other generation sources in Phnom Penh. The Banteay Meanchey Grid comprised of Substations at Banteay Meanchey, Battambang and Siemreap and received electricity from import from Thailand. In 2012 the Phnom Penh-Battambang 230 kV double circuit line with substations at Kampong Chhanang, Pursat and Battambang was commissioned. This provided a link to connect the National Grid with Banteay Meanchey Grid and the whole system is termed as National Grid. As it was not possible to run the supply from Vietnam with Supply from Thailand, the two systems were not operated in parallel, but many areas received supply from either source at different times. With increased generation from Kamchay and commissioning of Kirirom 3, the availability of supply improved in rainy season and supply from Phnom Penh area was extended upto Siemreap substation for some time during rainy season. Similarly during dry season supply from Thailand was extended up to part of Phnom Penh system. The supply from National Grid covered areas in the provinces of Takeo, Phnom Penh, Kandal, Kampong Speu, Kampong Chhanang, Pursat, Battambang, Banteay Meanchey and Siem Reap.

The licensees connected to National Grid and the details of the supply in 2012 are given in annexe 10 B.

Chapter 5

Report on Sub-Transmission and Supply of Electricity

CHAPTER 5
Report on Sub-Transmission and Supply of Electricity

5.1 Development of Medium Voltage Lines

On development of the high voltage grid system in Cambodia, medium voltage lines have been constructed from the grid substations to supply power to licensees and consumers in areas around the Grid Substations. Medium voltage lines have also been extended from many locations near borders of Vietnam and Thailand, where power is being imported by licensees at MV. In the last few years EDC and other licensees have played a major role in developing medium voltage lines for both purposes of sub-transmission and distribution. The length of MV lines operated by different licensees at the end of 2012 is given in Annexe 4, 5, 7, 8 B and 9.

EDC, with loans arranged from different sources is constructing new MV lines to extend the grid supply to more areas. Other licensees are also constructing new MV lines to avail grid supply, extend their area of supply or to improve the power supply in their area of operation.

5.2 Grid Supply Systems

Apart from the supply from the grid-substations, MV supply is made available at a number of areas along the border with Vietnam, Thailand and Laos by extension of 22 kV lines from Vietnam Grid, Thai Grid and Laos Grid and from large generating stations. This has resulted in the development of five grid systems operating at MV in Cambodia as described below;

1. Kampot-Sihanoukville MV Grid: This MV grid gets supply from Vietnam at 22 kV, generation from Kamchay Hydropower plant at MV, supply from National Grid through Kampot Substation and Generation plant of Colben Energy (Cambodia) Ltd and of EDC at Kampot and Sihanoukville. By end of 2012, EDC Kampot, EDC Sihanoukville and nine other licensees in Kampot and Sihanoukville provinces are connected to this grid.
2. Kampong Cham MV Grid: This MV grid consists of Generation plant of G.T.S. Power Ltd at Kampong Cham and the connected 22 kV system in Kampong Cham and Kampong Thom provinces connected to it. By end of 2012, this grid supplied electricity to EDC and 27 other licensees in the provinces of Kampong Cham and Kampong Thom.
3. MV Grid connected to Vietnam system: Cambodia imports electricity from Vietnam through 22 kV connections at 17 locations in the provinces of Kampong Cham, Svay Rieng, Kampot, Mondulkiri, Kandal, Takeo, Kratie, Prey Veng and Ratanakiri. The supply is then extended to other licensees. By end of 2012, 38 licensees got supply from the Vietnam grid.
4. MV Grid connected to Thailand system: Cambodia imports electricity from Thailand through 22 kV connections at 8 locations in the provinces of Battambang, Pailin, Banteay Meanchey, Koh Kong and Oddor Meanchey. The supply is then extended to other licensees. By end of 2012, 8 licensees got supply from the Thai grid.
5. MV Grid connected to Lao system: EDC imports power from Laos to supply to Steung Treng area.

Two Generation Licensees (i) Kampot Power Plant Co., Ltd and(ii) Angkor Bio Cogen Co., Ltd supply to captive industries Kampot Cement Co., Ltd and Angkor Kasekam Roongroeng Co., Ltd respectively.

The licensees connected to different grid supply, and the details of the supply in 2012 are given in annexe 10 A to 10 F.

5.3 Isolated Supply Systems

The rest of supply systems in Cambodia are isolated systems consisting of its own generation and supplying a small area generally belonging to one licensee. The information on number of consumers, energy available and supplied to consumers for these isolated systems has been estimated province wise and given in the following Table. The area of supply of a few licensees exists in two contiguous provinces and in these cases the province wise data has been estimated or assumed.

Table 10: Province wise Data on isolated systems for 2012

5.4 Supply of Electricity to consumers

Each year the infrastructure for supply of electricity to consumers gets added up due to issue of new licenses, expansion of area of supply and expansion of the grid supply. The details of MV lines and LV lines of EDC are given in Annexure 8B and that of other licensees is given in Annexures 4, 5, 6 and 9. With expansion of area of supply of existing licensees and issue of new licenses for new areas, the number of villages supplied with electricity increases each year. The total

number of villages and number of villages covered by the licensed area by end of 2012 in each province is given in Annexure 13.

A comparison of data on electricity Generation, Import from neighboring countries by licensees and data on consumers and consumption by them for Cambodia for the years 2011 and 2012 is given in the Table below.

Chapter 6

Electricity Tariff of Licensees

CHAPTER 6

Electricity Tariff of Licensees

6.1 Electricity Tariff

The cost of electricity either from own generation or from purchase from IPP, neighboring country or other licensees is the single largest component of the cost of electric supply by licensees to the consumers. About 60.19% of the electricity generated by licensees in Cambodia use Diesel/HFO as fuel. Hence for the licensees generating electricity using Diesel/HFO or purchasing electricity from IPPs with cost of purchase linked to the price of fuel, the cost of electric supply is related to the cost of Diesel/HFO. In order to quickly reflect the change in the cost of fuel in the tariff for consumers in a simple and transparent manner, EAC implemented Fuel Cost Adjustment (FCA) mechanism in the tariff of licensees. Under this mechanism, the tariff for different slab rates of fuel (diesel/HFO) is determined after public consultation, so that for only a change in the cost of fuel, the corresponding tariff is fixed by EAC without the need of further public consultation. For the licensees, who purchase electricity at a variable tariff, EAC has fixed the tariff for sale to consumers as the cost of purchase of electricity plus a fixed charge.

The cost of generation from hydro power plant, purchases from neighboring country or from other licensees does not fluctuate much. Hence the tariff for licenses getting electric supply from such sources does not have frequent fluctuations and EAC approved the tariff without any price variation mechanism.

6.2 Electricity Tariff based on cost of power purchase approved by EAC

The tariffs for sale to consumers for the licensees, purchasing power at a variable rate, as stated in the table below were determined by EAC during 2012.
